Industry Experience

Software Engineer, Jan 2021 - May 2023
DeveloperTown; Indianapolis, IN

Created frontends using component-based web architectures like React and Angular

Integrated into various in-house and client-run scrum teams

Web Developer, May 2020 - Nov 2020
Ballotpedia; Remote

Created and improved site components in preparation for Election Day 2020 that received over 10 million monthly pageviews

Built a collection of user-engagement centered pages that generated over $60,000 in donations within two months

Developer, Project Manager, Sep 2016 - May 2020
Digital Corps; Muncie, IN

Completed dozens of full-stack web solutions

Managed teams of over 20 students in the creation of a Ball State branded Multisite tool

Education

B.S. Computer Science, May 2020
Ball State University, Muncie, IN
Honors Diploma, Mathematics Minor

Projects

Milliman Marketing Portal
React App using MUI. A portal used by Bio-pharma corporations like Pfizer to coordinated internal marketing for new drugs, featuring search and filter functionality for large sets of data

Innovate WithIN Pitch Competition
Full stack LAMP + React. Facilitated a state-wide high school pitch completion, including pitch submission, online judging, pitch advancement system, and audience voting system

Turner Classic Movies Musicals
Embedded React App. An interactive experience teaching the fundamentals of tap dancing, featuring quizzes, drag and drop puzzles, and a guitar hero style mini game
